

National Pirogov Memorial Medical University, Vinnytsya

"APPROVE"

Vice -Rector of higher education institution
for Research, Education and Teaching
professor of HEI Oksana SEREBRENNIKOVA

“ 31 ” 08 2022 year

“ AGREED ”

Head of department of Pediatric №2
professor of HEI Veronika DUDNYK

“ 31 ” 08 2022 year

**SYLLABUS
OF ACADEMIC DISCIPLINE**
winter semestr
Medical genetics

Specialty	222 Medicine
Educational level	the second (master`s) level
Educational programme	EPP Medicine, 2022
Academic year	2022-2023
Department	<i>Pediatric №2</i>
Contact information	<i>pediatric2@vnmue.edu.ua, 108, Khmelnytske shosse, Vinnytsya, 21029 Communal Nonprofit Enterprise “Vinnytsia Regional Children’s Clinical Hospital of Vinnytsia Regional Council”, Tel (0432)560819</i>
Syllabus compiler	Associate professor of HEI, PhD Maryna SHALAMAI

1. Status and structure of the discipline

Discipline status	Compulsory
Discipline code in EPP/discipline place in EPP	EC 30, discipline of professional training
Course / semester	5 th year (<i>IX-X semesters</i>)
The amount of discipline (the total number of hours / number of credits ECTS)	30 hours / 1 credit ECTS
Number of content modules	8 modules
The structure of the discipline	Practical classes 16 hours Independent work 14 hours
Language of study	English
Form of study	Full-time (<i>or remote full-time by order</i>)

2. Description of the discipline

Short annotation of the course, relevance. The subject area of the discipline is to obtain knowledge of the mandatory discipline of professional training, the study of which is necessary for the successful professional activity. According to modern knowledge, any human pathology is more or less related to heredity. This provision is the basis for teaching and studying medical genetics as a clinical and preventive discipline. Because heredity and variability are integral parts of life, genetics should be the basis of theoretical and clinical training of physicians. The need for genetic knowledge for the doctor is also determined by the constant increase in the proportion of hereditary pathology in the structure of morbidity, mortality and disability of the population. The general concept of teaching medical genetics in higher medical institutions is to integrate genetic knowledge and clinical thinking of the future doctor. In this regard, pedagogical activities should be aimed primarily at helping students to actively understand the use of theoretical knowledge of genetics in clinical practice, replenishment of knowledge in medical and clinical genetics, especially modern problems of diagnosis, treatment and prevention of hereditary pathology, the study of a number of "new" common clinical forms of hereditary diseases.

Prerequisites. For successful mastering of discipline the student needs the knowledge received in the course of studying of the following disciplines of general preparation: anatomy, normal and pathological physiology, which give the concept of physiological processes of the organism and the pathogenesis of diseases. Medical biology speaks about the role of heredity in the development of childhood diseases and methods of diagnosing hereditary diseases. Clinical pharmacology studies the mechanism of action and side effects, application, interaction of drugs, which allows the appointment of adequate therapy for various hereditary diseases of childhood. Propedeutics of internal and pediatric diseases provides an understanding of the etiology and pathogenesis of the disease, teaches the student careful collecting the history of the patient, practical skills of objective

examination of the patient and the ability to interpret the results of additional research tests.

The purpose of the course and its significance for professional activities. The aim of the discipline is to form a skills of active use of theoretical knowledge of genetics in clinical practice, replenishment of knowledge in medical and clinical genetics, especially modern problems of diagnosis, treatment and prevention of hereditary pathology, study of a number of "new" common clinical forms of hereditary diseases.

Postrequisites. In the process of studying the discipline obtain the knowledge which will be necessary for successful mastering of disciplines, namely: pediatrics, pediatric infectious diseases, internal medicine, and other clinical disciplines, which involve the integration of teaching with these disciplines and the application of knowledge, skills and abilities in the process training and professional activities. Students study the discipline in the form of differential diagnosis of the most common hereditary diseases of childhood, practical skills of diagnosis and treatment of emergencies on the basis of stimulation class.

3. Learning outcomes.

After successful study of the discipline the applicant will be able to:

1. Know the basics of information and communication technologies and be able to use them in professional activities.
2. Collect data on patient complaints, medical history, family history, conduct a physical examination of the patient, be able to make and analyze the patient's pedigree. .
3. Highlight the leading clinical symptom or syndrome.
4. Establish the most probable diagnosis.
5. Assign laboratory and / or instrumental examinations, analyze the results.
6. Carry out differential diagnosis of hereditary diseases, using the most probable or syndromic diagnosis, data of laboratory and instrumental examination of the patient.
7. Establish a preliminary clinical diagnosis of hereditary disease using knowledge and logical analysis.
8. Determine the necessary therapeutic nutrition in the treatment of hereditary diseases.
9. To determine the principles and nature of treatment of patients with hereditary pathology.
10. Perform counseling about family planning.

4. Content and logistic of the discipline

Module 7 «Medical Genetics»	IX or X semesters, 30 hours / 1 credit ECTS	Practical classes № 1-7 Topics for self- study № 4.1,4.2, 4.3, 7.1
-----------------------------------	---	--

The course includes 12 topics, which are part of 1 thematic module.

Module 7 «Medical Genetics».

Topic 1. The subject and tasks of medical genetics. The role of heredity in human pathology.

Topic 2. Clinical and genealogical method. Cytogenetic and molecular genetic methods. Biochemical methods.

Topic 3. Semiotics of hereditary diseases. Features of the manifestations of the hereditary diseases. Morpho-genetic variants of the development. The hereditary deformity.

Topic 4. General characteristics of monogenic disease. Clinic and genetics of some forms of monogenic diseases. Hereditary metabolic Diseases. Principles of treatment of hereditary metabolic diseases, rehabilitation and social adaptation.

Topic 4.1 Hereditary kidney disease.

Topic 4.2. Systemic skeletal dysplasia

Topic 4.3 General characteristics of mitochondrial pathology. Clinic, diagnosis, treatment.

Topic 5. General characteristics of chromosomal disease. Clinic and genetics of some forms of chromosomal diseases.

Topic 6. General characteristics of the multifactorial diseases. Determination of genetic predisposition. Prevention.

Topic 6.1. Fundamentals of ecological genetics, farmakogenetics

Topic 7. Levels and ways of the prevention of the hereditary diseases. Medical and genetic counseling. Antenatal diagnostic. Screening programs.

Practical classes provide a theoretical justification of the main issues of the topic and the learning of the following practical skills:

- 1) to examine patients and their relatives and identify congenital and hereditary pathology;
- 2) to determine the clinical features of hereditary pathology and the condition of patients;
- 3) to evaluate the diagnostic, prognostic value of the detected symptoms and morphogenetic variants (microanomalies of development);
- 4) correctly collect genetic history, make a pedigree, determine the type of inheritance;
- 5) to diagnose the most common forms of hereditary pathology.

During practical classes, students in workbooks formulate conclusions on the topic and discuss clinical case, write pedigrees and analyze results of karyotyping.

The student's independent work involves preparation for practical classes and development of practical skills, study of topics for independent extracurricular work, elaboration of scientific literature and writing reviews according to recommended topics for individual work. The control of studying the topics of independent work is carried out on the final module.

Calendar plans of practical classes, thematic plan of independent extracurricular work, volume and directions of individual work are published on the website of the department.

Route of receiving materials: Department of Pediatrics №2 / Student / Full-time / Medicine / 5th year / Educational and methodical materials.

Access to materials is provided from the student's corporate account s000XXX@vnmua.edu.ua.

5. Forms and methods of monitoring academic performance

Current control in practical studies	Methods: oral or written survey, electronic survey, solving situational problems, working with pedigree diagrams and karyograms, their interpretation and evaluation of results (registration of the protocol in the workbook)
Differential Credit Test at the end of 9 or 10 semesters	According to the Regulation of the Academic process in National Pirogov Memorial Medical University (link https://www.vnmua.edu.ua/General information)
Learning success diagnostic tools	Theoretical questions, tests, clinically-oriented situational tasks, pedigrees, results of karyotyping.

6. Assessment criteria

Knowledge assessment is carried out in accordance with the Regulations of the Academic process in National Pirogov Memorial Medical University (link link <https://www.vnmua.edu.ua/General> information)

Continuous assessment	On a four point system of traditional assessments: 5 «excellent», 4 «good», 3 «satisfactory», 2 «unsatisfactory»
Final control of the discipline	Final module grade: 71-80 points - "excellent" 61-70 points - "good" 50-60 points - "satisfactory" Less than 50 points - "unsatisfactory" / did not pass
Discipline assessments:	Current academic assessment - from 72 to 120 points (conversion of the average traditional

	assessment of practical class on a 120-point scale): 60% of the grade for the discipline Final control - from 50 to 80 points: 40% of the grade for the discipline Individual work - from 6 to 12 points From 122 to 200 points in total.
--	--

Discipline Score Scale: National and ECTS

The sum of grades for all types of educational activities	Score ECTS	Score on a national scale	
		For exam, course project (work), practice	for credit test
180-200	A	Excellent	credited
170-179,9	B	Good	
160-169,9	C		
141-159,9	D	Satisfactory	
122-140,99	E	Satisfactory	-
0 – 121.99	FX	unsatisfactory with the possibility of reassembly	is not credited with the possibility of reassembling
	F	unsatisfactory with a mandatory reexamination of discipline	is not credited with mandatory reexamination of discipline

Criteria for student knowledge assessment

Assessment of oral / written response during the current assessment

The grade **"excellent"** is given to a student who has deeply and comprehensively mastered the theoretical material, competently and logically teaches it. He is fluent in Latin terminology, clearly answers non-standard questions on the topic of the lesson, is able to link the material of the topic with previously studied sections, which indicates knowledge of the recommended literature and the ability to analyze the material studied, and clearly demonstrates the importance of theoretical knowledge for practice Medicine

The grade **"good"** is given to a student who knows and has a good theoretical material, teaches it correctly, does not allow inaccuracies in the answer,

is able to reveal the topic from the standpoint of its medical significance and practical application, but the answers do not go beyond the textbook, guidelines.

A grade of **"satisfactory"** is given to a student who knows the basic concepts and definitions of the studied topic, but admits significant inaccuracies or has difficulty in formulating the answer, does not understand the medical aspects of the topic, can not relate theoretical material to practice.

The **grade "unsatisfactory"** is given to a student who does not know the theoretical foundations of the topic, makes gross mistakes in answering, does not understand the basic concepts and definitions, can not explain the importance of theoretical material for practical medicine.

Assessment of practical skills during the current assessment

The grade **"excellent"** is given to a student who knows the course and sequence of independent learning to perform a practical task, seeks the best options for diagnosis, and demonstrates the correct implementation of the necessary practical skills, and true with clear formulations of conclusions.

A grade of **"good"** is given to a student who makes inaccuracies in describing the phenotype, but is able to identify errors and can demonstrate the implementation of practical skills in general, accurately draws up the results of the pedigree in the notebook.

Assessment of **"satisfactory"** is given to a student who knows the basics of the practical task, but has difficulty in performing this, cannot demonstrate the correct sequence of practical skills to describe the phenotype, fully interpret the results of examinations, make pedigree.

The grade **"unsatisfactory"** is given to a student who cannot demonstrate practical skills, has significant difficulties in describing the phenotype, compiling a pedigree and determining the type of inheritance, karyogram analysis, does not register the progress of work in the protocol.

Assessment of independent student work

The student's independent work is assessed during the final classes of the module of the discipline through an oral interview on topics that are not included in the plan. Evaluation of prepared messages, presentations on the selected topic is carried out by traditional evaluation

The grade **"excellent"** is given to a student who has deeply and comprehensively revealed the problem, logically stated the main issues, give examples from medical informative sources. He is able to connect the material of this topic with the previously studied sections, which indicates the ability to analyze the studied material, as well as clearly demonstrates the importance of the acquired theoretical knowledge for practical medicine.

The grade **"good"** is given to a student, who knows and is well versed in theoretical material, competently revealed the main issues of the topic and its medical significance, but did not go beyond the textbook, guidelines.

A grade of **"satisfactory"** is given to a student who has revealed the basic concepts and definitions of the recommended topic, but has not fully disclosed it, does not understand the medical aspects of the topic, relate theoretical material to practice.

The calculation of individual points is carried out on the basis of the Regulation of the Academic process in National Pirogov Memorial Medical University (link <https://www.vnmu.edu.ua/General> information).

12 points - added to the assessment of the discipline for a student who won a prize at the interuniversity competitions in the discipline or a prize at the Ukrainian competition of student research reports or a prize at the interuniversity / international scientific conference with the published work;

11 points - are added to the assessment of the discipline for a student who won the first prize at the intra-university Olympiad in the discipline or the first place at the student scientific conference with the published work, or participated in the Ukrainian competition of student research papers;

10 points - are added to the assessment of the discipline for a student who won a prize (II-III) at the intra-university Olympiad in the discipline or at the student scientific conference with the availability of printed work; or for participation (without a prize place) in interuniversity competitions in the discipline or a prize place in an interuniversity / international scientific conference with the availability of published work.

9 points - are added to the assessment of the discipline for a student who participated (without a prize) in the intra-university Olympiad in the discipline or student scientific conference with the presence of published work

8 points - are added to the assessment of the discipline for a student who actively participated in the student scientific group, published a paper with results of scientific and practical research, but did not personally participate in the student scientific conference, prepared a poster report.

6 points - are added to the assessment of the discipline for a student who has made tables, or an educational video, thematic illustrated presentation to replenish the visual support of teaching the discipline (taking into account the volume and importance of work performed).

Assessment of the oral answer during the final control (Differential credit test)

The grade **"Excellent"** is given for the work in which the student answered all the questions correctly. The answers are deep, meaningful and specific. The student must know the features of clinical manifestations of childhood diseases, general principles of diagnosis and treatment.

The grade **"Good"** is given for the work in which the student correctly answered 75% of the questions and showed a fairly substantial knowledge of those issues that reflect the main sections of the curriculum. The student must know the features of clinical manifestations of childhood diseases, general principles of diagnosis, treatment and prevention.

The grade **"Satisfactory"** is given for the work in which the student correctly answered 50% of the questions. The answers are incomplete, mostly limited to a simple list of components, features, without the details. The student must have a minimum of theoretical and practical knowledge of childhood pathology.

The grade **"Unsatisfactory"** is given for work in which the student did not give any correct answer or gave only an approximate answer to two questions. The student does not have the required minimum knowledge of pediatric pathology.

7. Policy of discipline / course

The student has the right to receive high-quality educational services, access to contemporary scientific and educational information, qualified tutoring during the study of discipline and mastering practical skills. The policy of the department during the providing of educational services is a student-centered, based on normative documents of the Ministry of Education and the Ministry of Health of Ukraine, the Statute of the University and the Procedure for the Providing of Educational Services regulated by the main principles of the organization of the educational process in National Pirogov Memorial Medical University and the principles of academic integrity (link [https://www.vnmu.edu.ua/General information](https://www.vnmu.edu.ua/General%20information)).

Adherence to the rules of National Pirogov Memorial Medical University, safety techniques in practical classes.

Occupational safety instruction with students during labor, professional training in health care institutions is conducted by the head of the structural unit of the institution or the student's immediate supervisor. Before the beginning of practical classes in the first lesson (at the beginning of each semester) the teacher, according to the requirements of the Job description, conducts instruction on labor protection (including rules of personal hygiene, sanitary regime, danger during supervision of patients, etc.). Targeted instruction is conducted with students in the case of organization outside of educational activities (competitions, conferences, etc.).

Requirements for preparation for practical classes. The student must be prepared for a practical lesson, situational tasks for the current topic should be solved in a workbook. They should come to class on time, without delay. A student who is late more than 10 minutes for class is not allowed to be present and must rework it in the prescribed manner.

In practical classes, the student must be dressed in a work uniform (medical gown, hat, medical mask, changeable shoes). Students who do not have a work uniform are not allowed to study.

The student must follow safety rules during practical classes and in the hospital. When discussing theoretical issues, students should demonstrate tolerance and respect for their colleagues and the teacher.

Usage of mobile phones and other electronic devices.

The use of mobile phones and other electronic devices in the classroom is allowed only during electronic testing or surveys.

Academic integrity. When studying the discipline, the student must be guided by the Code of Academic Integrity and Corporate Ethics of National Pirogov Memorial Medical University (link : [https://www.vnmdu.edu.ua/General information/](https://www.vnmdu.edu.ua/General%20information/) Code of Academic Integrity).. In case of violation of the norms of academic integrity during the current and final controls student receives a grade of "2" and must work it out to his teacher in the prescribed manner within two weeks after receiving an unsatisfactory assessment).

Missed classes. Missed classes are reworked in the manner prescribed by the Regulations on the organization of the educational process in National Pirogov Memorial Medical University (link [https://www.vnmdu.edu.ua/ General information / Basic documents](https://www.vnmdu.edu.ua/General%20information/)) at the time specified in the schedule (published on the website of the department [https://www.vnmdu.edu.ua/ Department of Pediatrics №2 #](https://www.vnmdu.edu.ua/Department%20of%20Pediatrics/)) to the teacher who conducts a practical lesson. To complete the missed lesson, the student must answer questions of the topic writing or orally.

The procedure for admission to the discipline final control is giving by the Regulations on the organization of the educational process in National Pirogov Memorial Medical University (link [https://www.vnmdu.edu.ua/ General information / Basic documents](https://www.vnmdu.edu.ua/General%20information/)). Students who do not have missed practical classes and lectures and received an average traditional grade of at least "3" are allowed to pass final control.

Additional points. Individual points in the discipline that student can receive for individual work, the amount of which is published on the website of the department in the teaching materials of the discipline and is determined by the results of his individual work according to Regulation of the Academic process in National Pirogov Memorial Medical University (link [https://www.vnmdu.edu.ua/General information](https://www.vnmdu.edu.ua/General%20information/)).

Conflict resolution. In case of misunderstandings and complaints to the teacher because of the quality of educational services, knowledge assessment and other conflict situations, student should submit his / her claims to the teacher. If the issue is not resolved, the student has a right to apply to the head of the department according to Complaints Consideration Procedure ([https://www.vnmdu.edu.ua/ General information / Basic documents](https://www.vnmdu.edu.ua/General%20information/)).

Politics in time of remote learning. Distance learning regulated by the Regulations of the elements of remote learning in in National Pirogov Memorial Medical University ([https://www.vnmdu.edu.ua/ General information](https://www.vnmdu.edu.ua/General%20information/)). The main training platforms for studying are Microsoft Team and Google Meets. Practical classes and lectures, exercises and consultations during distance learning is published on the website of the department ([https://www.vnmdu.edu.ua/ Department of Pediatrics№2/Student](https://www.vnmdu.edu.ua/Department%20of%20Pediatrics%20-%20Student/) or [https://www.vnmdu.edu.ua/Department of Pediatrics№2/ News](https://www.vnmdu.edu.ua/Department%20of%20Pediatrics%20-%20News/)).

Feedback from teachers is via messengers (Viber, Telegram, WhatsApp) or e-mail (at the teacher's choice) during working hours.

8. Educational resources.

Educational and methodological support of the discipline is published on the website of the department (<https://www.vnmu.edu.ua/> Department of Pediatrics№2/ To students).
